

TEACHERS' TRAINING

SESSION: 2022-23

It has been well said that the things which were common yesterday, have become obsolete today and which are being practised these days, will be out of fashion tomorrow. In the same way, teaching paradigms are adopted in compliance with the mental level of the students. In order to keep the teachers well-apprised of the latest teaching methodologies to get the maximum outcome, the training sessions are organized time-to-time for the teachers. We send the teachers in the Capacity Building Programmes in other schools also. The Resource Persons are also invited to school for the Teachers' Training. The Teachers' Training is very significant for the effective teaching and classroom management. Regular training and feedback keep the teachers updated. This ensures impeccable teaching-learning ambience.
